LUXURY FINISHES

In a fitting tribute to the artists of the Dominican Republic and the artistic and cultural district of Santo Domingo, Jardines de Bellas Artes is built with the highest quality materials and the finest finishes and masterful design touches.

For instance, the fine design of its contours maintains a chromatic balance throughout the work, ranging from the silver grey of the concrete structure to the ochre of the lattices that crown the building. The dynamic lighting, and fine texture of the ceilings, doors, windows and floors, help create exquisite and unique spaces, which are a tribute to the country's rich artistic and architectural heritage.
